
(a) APSP in one step
Ground truth
a real response
Synthetic
a model response
Is the policy already close to the data?
Close sign +
keep the response
Still far sign −
push the response away
Update the next policy
the sign is held fixed
(b) What the sign does to the model
SPIN
invariably penalizes
synthetic responses
APSP close
reinforces responses
aligned with data
APSP far
penalizes responses
far from data
data
model
raise
lower
